OILTANK ACCESSORIES

Put the vacuums away!

Item #OTL1238

No need to panic when the tank is loaded and you need to work on the feed to the burner.

Just isolate the tank by using this elbow and our 3/8" F x F Ball Valve with Steel T-handle (shown below).

OIL TANK ELBOW

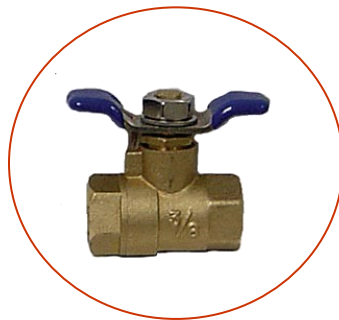

1/2" x 3/8" steel elbow for bottom drain oil tanks

Dimensions 2 1/2" x 6"

This heavy duty schedule 40 steel elbow will not break with pressure from ice or someone's step. This elbow extends 2" past outside of tank allowing for easy connection of isolation valves. Inline fusible oil valve can be placed after isolation valve.

Now that's a smart set up.

3/8" F x F Ball Valve with Steel T-handle for use w/OTL
Item # BVTISC
