1/4 Turn Boiler Drain *patented

Sizes: 1/2", 3/4"

Description:

The solid brass Raven Boiler Drain provides speed and efficiency by utilizing a reliable quarter turn ball valve. The Raven Boiler Drain offers the flexibility of a dual pattern combination 1/2" or 3/4" sweat/threaded end connection. The extended threads on the 45° angled Bibb spout provides convenient connection and prevents hose kinking.

Models (also available in chrome and lever handle):

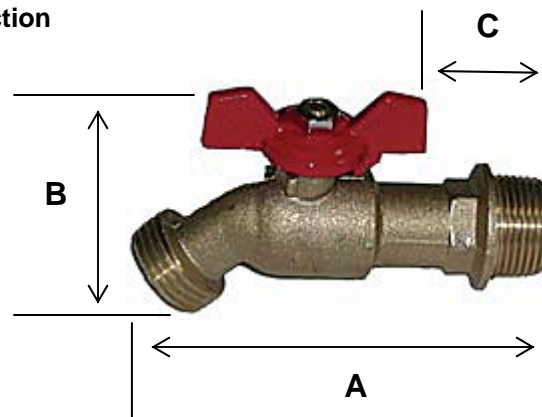

12BDBT
 34BDBT

Features:

- 1/2" Male NPT/Sweat x Hose Bibb - model
- 3/4" Male NPT x Hose Bibb - model
- Forged brass body
- 1/4 turn ball valve with Teflon seats
- Maximum operating temperature = 300° F
- Minimum operating temperature = 32° F with water, 5° F without water in valve
- Maximum operating pressure = 360 PSI
- Low operating torque
- Suitable for a full range of liquids
- Adjustable packing nut on ball valve
- 45° angled Bibb spout for convenient connection and anti-kinking
- Extended threads on Bibb spout secure connection

Materials:

Handle Nut - Nickel plated brass
 Handle - Aluminum
 Packing Nut - Brass
 Stem Packing - PTFE
 Stem - Brass
 Body - Brass
 Seats - PTFE
 Ball - Chrome plated brass
